JUST A LITTLE CHAOS

PROJECT OVERVIEW — LITEPAPER

Version 1.0 | October 2026

Built around community. Driven by creativity. Growing together.

01 / INTRODUCTION

BUBLO is a community-driven meme coin project built on the Solana blockchain. Created around an original character, a playful identity and a community-first philosophy, BUBLO aims to bring people together through memes, creativity and shared activities.

BUBLO is more than a token symbol. It is a growing community built around one simple idea:

JUST A LITTLE CHAOS.

We believe that a strong community is built through participation, creativity and consistency — not unrealistic promises.

02 / VISION & PHILOSOPHY

Our vision is to build a recognizable meme project with an active and creative community. BUBLO follows four core principles:

- Community First — People are at the heart of the project.
- Real Growth — Focus on organic development rather than artificial hype.
- Real People — Encourage genuine participation and creativity.
- Just a Little Chaos — Keep the project fun, original and recognizable.

We want BUBLO to grow naturally, one community member at a time.
